

Training Policy

As an organisation providing commercial cleaning services to commerce and industry, Cleandustrial Services Pty Ltd is committed to improving its professionalism and quality of service in the marketplace by promoting and encouraging training throughout its workforce. Our goal is to fully develop the skills of our cleaning, operational and support staff, largely through on-the-job instruction, guidance, and coaching by either our own team of experienced and competent staff, or an accredited trainer. Where deemed necessary and available, Cleandustrial will also make use of nationally-accredited and customised courses.

For cleaning and operational staff, training is carried out wherever possible, by registered training providers and assessors, ensuring the most relevant, professional and industry-specific training available. Specialised training is also a priority for management and support staff in all areas relevant to the organisation's business.

Training, and subsequently the opportunity for development and promotion, is offered to and encouraged for all staff, regardless of any personal characteristics, including gender, age, nationality etc. Cleandustrial Services Pty Ltd is committed to ensuring that the development of skills and competencies is part of the natural progression of employment with the company.

By continually assessing training needs as part of our quality management system and committing to meet those needs, we guarantee our customers a safe, productive and professional workforce.
